

engraving & etching

plaques

engraved or etched plaques are a superb and classy way to celebrate or mark an event. whether it is an opening or naming of a building, office, park or centre you simply cannot do without an engraved or etched plaque.

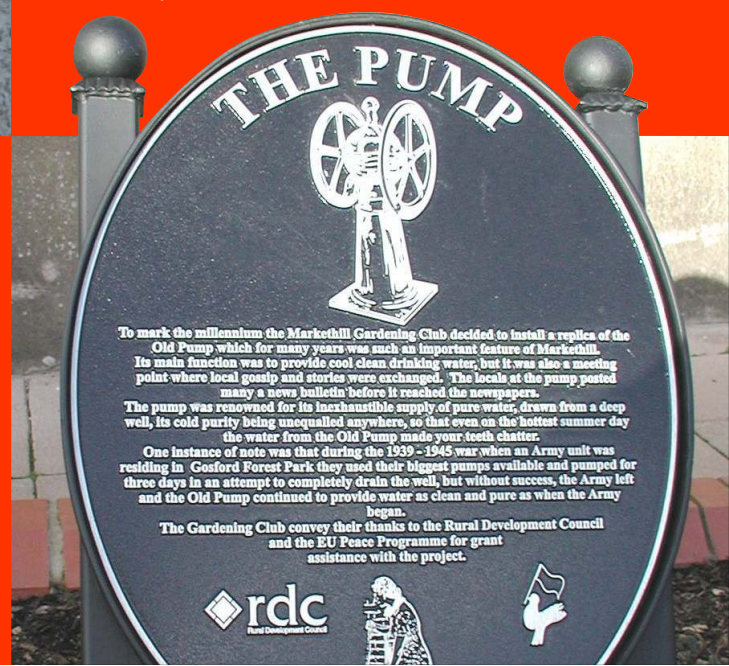

Engraved stainless steel frame - Armagh Observatory

choose your material

brass, anodised aluminium, stainless steel, wood, engraving laminates and stone effect are just some of the materials that can be machined into using in house design and computer aided cnc.

Acid etched zinc plate - Markethill

Engraved stainless steel - Armagh Council

fine detail etching

when intricate designs are required photo or acid etching may be required. the plaque is acid etched allowing fine detail to be achieved. zinc plate is the preferred material and can be finished to your colour specification.

brass plaques

☛ polished brass plaques offer a more traditional look and feel. popular for use as commemorative or memorial plaques in churches and old style buildings.

Engraved brass plaque - Cathedral Music Hall

Acid etched plaque - National Aero Club of Ireland

the final touch

☛ it's all about the accessories. we know that it's those finishing touches that make any sign and that's why we provide quality caps and fixings. we also offer wooden mounts in various colours suitable for fixing directly to walls

Stainless steel plaque complete with wooden mount

Tactile and Braille

casting

☛ bronze and aluminium casting.
we can machine out reliefs which we then send to foundry for casting

Bronze casting
